## ACTIVITY REPORT

APRIL 2023 - MARCH 2024

**GURUPRIYA VISION RESEARCH  
FOUNDATION  
ACTIVITY REPORT  
APRIL 2023 - MARCH 2024**

# GURUPRIYA VISION RESEARCH FOUNDATION

## Activity Report: April 2023 - March 2024

Blindness is an unfortunate and tragic occurrence, especially if the blindness could be easily averted. There are three main causes of such needless blindness that continue to plague India today. Poverty and lack of awareness are contributing to this dismal state. The causes are:

- Retinopathy of Prematurity (ROP)
- Refractive errors in children
- Diabetic Retinopathy

### **Retinopathy of Prematurity (ROP)**

There are certain unique problems facing a child, which is born preterm (prematurely) before the completion of the full-term of ten months. One such problem is ROP, which, if untreated or treated late, results in blindness in 50% of the cases. ROP is the most common cause of childhood blindness in the west. In India too, its prevalence is on the rise. The incidence of ROP reported in various Indian studies varies from 38% to 52%. Currently, we are facing what is called the third epidemic of ROP in the world, with developing countries such as India contributing to a major part of the disease burden. Management of ROP is a team work between committed eye specialists, sensitized pediatricians, diligent paramedical staff, efficient social workers and compliant parents. The need of the hour is the identification of the infants who are at risk and are in need of prompt treatment.

## **Refractive errors in children**

Currently, 5% of school going children in India needs to wear glasses. Thanks to the changing life style, this percentage is on the rise. This has been our experience as well, on analysis of the data collected at the school eye screening camps conducted by us. In fact the incidence was found to be 30% in our camps! If the refractive error remains uncorrected, it affects the child vision and overall physical and mental development. Such children are also wrongly dubbed as being “dull” or “unintelligent” at school. Hence, it is of paramount importance that such children are identified and treated early. The best way to achieve this is to conduct school screening camps at the school premises itself.

## **Diabetic Retinopathy**

Diabetes is on the rise in the country and very soon India may become the diabetic capital of the world. A diabetic patient is 25 times more likely to become blind than a non-diabetic person. Only a very small percentage of the diabetic patients are referred for an eye examination to rule out diabetic retinopathy (a sight threatening affliction caused by diabetes of the retina). Diabetic retinopathy occurs in 18% of the diabetic population, with treatable retinopathy occurring in 7% (rural) to 13% (urban) of the diabetic population. Not all ophthalmologists in India are trained to detect and treat Diabetic Retinopathy. WHO's VISION-2020: Right to Sight Program has clearly identified Diabetic Retinopathy as a priority area in India.

## **Gurupriya Vision Research Foundation**

Radhatri Nethralaya, a Chennai-based tertiary eye hospital, launched its charitable trust Gurupriya Vision Research Foundation (GVRF), on the occasion of its first anniversary on September 13, 2009. The trust was started with the ardent hope of eliminating the above mentioned three principal causes of needless blindness. The trust has made provisions for free screening and treatment of infants with ROP belonging to the lower strata of the society, conducts extensive school screening camps including corporation schools and spearheads awareness about diabetic retinopathy through specialty diabetic eye disease camps and awareness talks. In addition, general eye camps wherein patients with cataracts are brought in from villages and slums, operated, kept overnight and dropped back the next day are also carried out under the aegis of the trust. The trust also proposes to ensure lifelong free eye treatment for children belonging to orphanages as well as mentally challenged children.

One of the long term goals of the trust is to further combat the menace of ROP by screening the infants in hitherto unscreened rural areas in Tamil Nadu. This has been made possible with the recent procurement of the Neo Retcam, a wide-field digital portable imaging camera and using Tele-Ophthalmology to identify babies with ROP in the remote villages of Tamil Nadu. Prof. Viswanatha Raghavan, Emeritus professor from IIT, a resident of Nungambakkam, had donated the camera in July 2017 to Gurupriya Vision Research Foundation.

A van to transport the camera was also recently procured by the trust in March 2018, thanks to donations from well-wishers, which included Prof. Viswanatha Raghavan, JCI Chennai Royals, Shri. Srihari, Smt. Chitra Krishnamoorthy and Shri. Rengesh and their Families, Tamilnadu Foundation (USA) and Smt. Leela Devi Munoth Foundation. This teleophthalmology project to screen for ROP in remote places has been christened "Vision on Wheels: Balanethra Phase two"

## Eye Camps

Four kinds of eye camps conducted under the aegis of the trust aim to achieve the above mentioned goals.

### **1) PROJECT KANNOLI: Free cataract screening and surgery camps for the needy**

We continue to do all eye camps with all COVID Safety protocols in place despite the pandemic and the lockdown as much as possible. Our camp team consisting specialized optometrist wore mask, gloves and PPE's and ensure adequate social distancing of all patients.

- The hospital staff members along with the medical equipment go to villages, slums and public places such as parks and check patients for eye problems. As required, glasses are prescribed and assistance given in procuring the glasses. Those patients requiring cataract surgery are brought to the Radhatri Nethralaya in the hospital van. Digital biometry is carried out to calculate the required power of the Intra Ocular Lens (IOL). The patients then undergo state-of-the art, suture-less Phacoemulsification surgery with IOL implantation. They are given dinner and overnight accommodation in the hospital premises. After breakfast next morning, they undergo postoperative check up by the surgeon. They are then dropped back in the hospital vehicle to their villages or other screening places. All these are done totally free of cost. Table gives the data of camps held in April 2023 - March 2024. A total of **6007** patients were examined from villages around Chennai and slums in the city.

**A TOTAL OF 126 PATIENTS UNDERGONE FREE CATARACT SURGERY  
FROM APRIL 2023 TO MARCH 2024**

## LIST OF EYE CAMPS

## PROJECT RADAR WALKATHON

Project RADAR (Diabetic Retinopathy project with Rotary) Walkathon at Besant Nagar Beach was conducted on 17<sup>th</sup> December 2023 with 250 attendees comprising of college students, doctors, Rotarians, female auto drivers participating. The walkathon was graced by the presence of Honorable Minister of health Mr. Ma Subramanian. The chief guest was Rotary Past District Governor Natarajan Nagoji and Guest of Honour was Actor Rekha Nair. Asst Commissioner of Police Mr. Julius encouraged the participants by his presence.

The walkers shouted slogans, distributed pamphlets, carried placards and banners, to create awareness on Diabetic Retinopathy: the blinding disease affecting diabetic patients.

The optometry and nursing students who participated in the walkathon, received certificates of participation recognising them as Yuva Nethra Jyotis: Youth Vision Ambassadors.

# In Press about Project RADAR WALKATHON

THURSDAY 21, DECEMBER 2023 | CHENNAI

A walkathon was held at Elliot's Beach, Besant Nagar on Sunday, (December 17, 2023), to create awareness on Diabetic Retinopathy (the blinding disease affecting the eyes due to diabetes). Radhatri Nethralaya Eye Hospital along with Rotary Dist 3232 Health & Public Image team organised the event in which hundreds of energetic students from arts and optometry colleges, Rotarians, doctors, and "Veera Peragal" (female auto drivers of Chennai) participated. Sakha Nair actress was the guest of honor and Mr Natarajan Nagaji was the chief guest. Hon'ble minister for health Ma Subramanian and ACP Mr. Julius pleasantly surprised and encouraged the walkers with their appearance. The programme was an eye opener for diabetic patients and the public on how to recognise visual symptoms of diabetic retinopathy (eg. vision changes, floaters, distortion) and the need to regularly get the eyes examined. The walkers shouted slogans, distributed pamphlets, carried placards and banners, to create awareness on Diabetic Retinopathy. The participating students received certificates of participation recognising them as Yuva Kethra Jyotis: Youth Vision Ambassadors of Radhatri Nethralaya.

## 4) PROJECT BALANETHRA: Free Treatment for ROP

- Free screening and treatment of preterm infants for ROP disorder at five Government hospitals has been on-going this year too, under the aegis of Gurupriya Vision Research Foundation.
- Regional Institute of Obstetrics and Gynaecology (IOG), Egmore
- Raja Sir Muthiah Govt Hospital (RSRM), Royapuram
- Stanley Hospital
- Kilpauk Government Medical College
- Government (Gosha) Hospital in Triplicane.
- Weekly free screening of atleast 110 pre-term infants is being carried out at the Institute of Obstetrics and Gynaecology (IOG), Govt hospital Triplicane (Gosha Hospital), Government children's hospital RSRM, Stanley Government hospital and Kilpauk medical college. We have screened **5259** Pre-term infants in the period between April 2023 to March 2024

Table lists the consolidated list of **401** infants that underwent free laser surgery in the period between April 2023 to March 2024.

**LIST OF BABIES WHICH UNDERWENT LASER IN APRIL 2023 – MARCH 2024**

## SOME OF OUR BALANETHRA BABIES:

*Baby of Sariga*

*Baby of Vinothini*

*Baby of Vaishnavi*

*Baby of Afija*

*Baby of Sivabharathi*

*Baby of Priya*

*Baby of Mohana Twin A*

*Baby of Manjula*

*Baby of Pushpavalli*

*Baby of Sabitha*

*Baby of Divya Twin B*

*Baby of Sunitha*

*Baby of Vinothini*

*Baby of Ashwini*

*Baby of Roja*

*Baby of Gayathri*

*Baby of Anjuka*

*Baby of Kani*

## 5.) PROJECT VISION ON WHEELS: Free screening for ROP in rural areas by teleophthalmology

Radhatri Nethralaya eye hospital entered its Sixteenth year in September 2023. In this journey, we have touched the lives of more than 85000 patients and have adhered to the policy of treating all patients equally with compassion and quality, irrespective of their social and economic status.

Our niche area has been paediatric eye care and we deal with a lot of preterm babies and have performed many a difficult eye surgery on them. Under the aegis of our public charitable trust, Gurupriya Vision Research Foundation, we have been running a project called **Balanethra: Tender Vision**, which provides for free vision-preserving laser surgery for premature babies from poor socio-economic background, who have the blinding condition called ROP (Retinopathy of Prematurity). The Rotary International, USA has recognised Radhatri Nethralaya as a centre to perform free ROP surgeries through a global grant in 2016.

The ROP laser surgery stops the bleeding in the retinal blood vessels in premature babies and allows normal retinal development to be completed. Thereby needless blindness is averted. Several of our patients and other philanthropic organisations had helped us time and again to do this. All these babies were from urban areas and slums in and around the city.

There are indeed a lot of babies in remote villages which may not be treated and so turn blind, due to lack of awareness and access to health care.

In order to reach out to babies from rural areas, **Vision On Wheels:** was envisaged wherein a mobile van with a retinal camera (RETCAM) would be sent to the villages and photographs of the retina of the pre-

term babies taken, graded by the certified technician (tele-ROP screening) and sent via internet to the doctors at Radhatri Nethralaya. Those babies requiring treatment would be shifted immediately for free treatment to Radhatri Nethralaya in Chennai.

Through the donation of the two cameras **3 Nethra Neo** by one of our patrons, this project is finally made possible. A mobile van which is sturdy enough to transport the sensitive camera and the babies, negotiating the rough village roads, was procured recently thanks to contributions from well-wishers and philanthropic organizations. The van would soon be modified to carry an infant warmer/incubator. In rural areas, due to poverty and lack of awareness, the parents hesitate to bring the baby on their own to the city for treatment. So, to ensure that the screening culminates in timely treatment of the needy babies, they have to be brought back for treatment in the same van on the same day.

### **LIST OF VOW SCREENINGS FROM APRIL 2023 TO MARCH 2024**

**PHOTOS OF MOTHERS WITH BABIES, LISTED FOR ROP SCREENING BY PROJECT VISION ON WHEELS AT VARIOUS GOVERNMENT HOSPITALS IN RURAL AREAS**

## ROP SCREENING BY HANDHELD RETINAL CAMERA

## 6.) YUVA NETHRA JYOTIS (YOUTH VISION AMBASSADORS)

On the occasion of world Prematurity week, in Nov 2023, We have conducted an awareness program on Retinopathy of Prematurity (ROP): the blinding disorder affecting preterm babies amongst school children of Ashok Nagar Govt. Girls school and empower them to become Yuva Nethra Jyotis (YOUTH VISION AMBASSADORS).

The poster features logos for Rotary, Create Hope in the World, NEITHAL Waves of Change, Radhatri Nethralaya Complete Vision Care, and the school's emblem. The text is centered on a yellow background with a cartoon baby superhero at the bottom.

**RADHATRI NETHRALAYA**  
is proud to confer the title of  
**YUVA NETHRA JYOTI**  
**YOUTH VISION AMBASSADORS**

IN RECOGNITION OF SPREADING AWARENESS IN  
THE COMMUNITY ABOUT RETINOPATHY OF  
PREMATURITY(ROP): THE BLINDING DISORDER  
AFFECTING PRETERM BABIES.

DATE : 23. 11. 2023

🕒 TIME : 9:30AM TO 10:30AM

📍 VENUE : GOVERNMENT GIRLS HIGHER  
SECONDARY SCHOOL  
ASHOK NAGAR  
CHENNAI - 600083

## 7.) PROJECT NETHRA RAKSHAK:

Free Vision therapy to help special children with cerebral palsy, CVI, Autism, Retinal disorders, developmental delay, genetic problems etc to see better was launched at Radhatri Nethralaya under the aegis of GVRF in September 2023. The Launch was by the golden hands of Rtn Tankaraju, his gracious spouse Ann Medlin from Rotary club of Damansara (Malaysia) and distinguished rotarians from Rotary club of Chennai Towers and Anna Nagar Madras

**BABIES UNDERGOING FREE VISION THERAPY:**

INDIA'S LARGEST ENGLISH NEWSPAPER

## A JOURNEY OF LIGHT IN TACKLING EYE DISORDERS

**R**adhatri Nethralaya, a 15-year-old NABH-certified tertiary eye care hospital in Chennai, has modern diagnostic facilities and surgical technology from A to Z in Ophthalmology.

Radhatri Nethralaya's niche areas of expertise are diabetic retinopathy, phaco surgery for cataracts, age-related macular degeneration, ROP, glaucoma, squint, lazy eye and myopia reduction in children.

Radhatri Nethralaya is run by the doctor couple, Dr. Praveen Krishna, who specialises in cataract and paediatric ophthalmology, and Dr. Vasumathy Vedantham, who is a vitreoretinal surgeon with special expertise in paediatric and geriatric retinal disorders.

They have been recognised as the "Distinguished Ophthalmology Couple of India" and have received several awards for excellence in eye care delivery. Some of the awards include the International Sherpa Award from Nepal, PMI South Asia award, International XOVA, eXcellence in Ophthalmology & Vision award and grant, Mahatma Award from Aditya Birla Group, Maruthuva Natchatiram award from IMA, and the first Dr. Badrinath Sankara Nethralaya Gold Medal from Tamil Nadu Ophthalmic Association. Dr. Vasumathy was recognised as among India's top 20 women ophthalmologists by the Ophthalmology World Report.

Located in the calm surroundings of T. Nagar, Radhatri Nethralaya has a vision and mission for excellence in eye care regardless of socio-economic status and is well known for its compassionate eye care delivery. The hospital is a partner with the National Programme of Control of Blindness of the Government of India.

**Dr. Praveen Krishna and Dr. Vasumathy Vedantham**

Radhatri Nethralaya is one of the few premium tertiary referral eye hospitals in India for preterm babies with the blinding condition called Retinopathy of Prematurity (ROP).

Through their innovative rural teleophthalmology programme: "Project Vision on Wheels", more than 80,000 babies all over rural Tamil Nadu and Andhra Pradesh have been screened for ROP by a specialised retinal camera, and more than 4000 babies with ROP have been treated free of cost and thereby prevented from becoming blind.
